

Commercial Cooling Towers

Sales & Service Since 1976

Satisfying Customers from Coast to Coast for Decades.

The best testament to our commitment to meeting the needs of our customers is the customers themselves! This is what a few of them had to say:

BP Canada Energy Company

Thank you Cooling Tower Maintenance for an excellent job on the refurbishment of our 3-cell cooling tower structure at the Sarnia Plant. The scope of work was extensive with the complete replacement of all grid, V-bar, louvers, 3 fan units, and various structural repairs. Work had to be staged with access to only one cell at a time while the other two cells remained operational. All field activity work was completed very efficiently, timely and safely. Your professional guidance was greatly appreciated.

Cooling Tower Maintenance also provided excellent assistance in helping us assess the required upgrade necessary to achieve an increase in thermal performance of our cooling tower unit. It now appears that we have met our desired performance as indicated by our follow-up field testing.

William J. Kay, P.Eng.
Engineering Supervisor

O&Y Enterprise

I have used the services of Cooling Tower Maintenance for 20 years and have found that they respond promptly and that the quality of their work is excellent. Their technical expertise has complemented my own during the planning stages of my latest project of installing V.E.D. on the cooling tower fan motors. I am very happy with the company's professionalism and the service that they provide.

Dave Lawrence

NPS Allelix Corp.

We have used Cooling Tower Maintenance since the late '80's for maintenance on both the cooling towers and the airhandling units in our facility. Results: No job too big or too small, each job is seen through to its successful completion and help is always available on any operational problems.

Bill Harrison

Inco Limited

I would like to take this opportunity to thank Cooling Tower Maintenance for many years of quality work, on time and on schedule. Your detailed and accurate inspections have also helped in keeping our cooling towers in good repair.

Ted Kutschke
Chief Utilities Engineer

Cooling Tower Maintenance Inc.

Expertise. Experience. Professional Advice. Coast-to-Coast Satisfaction Since 1976

For decades, plant managers and engineering professionals across the country have relied on Cooling Tower Maintenance Inc. for state-of-the-art expertise in commercial and industrial cooling tower applications. Our highly skilled staff is well-versed in evaluating all makes and models of towers, offering comprehensive analysis and solutions.

It may be a new tower, a replacement, a thermal upgrade, a rebuild, or a parts requirement. It could be condenser repairs, evaporator tube cleaning or a new air handling system. Perhaps an ongoing maintenance program is needed. Whatever the challenge, you can depend on Cooling Tower Maintenance Inc. to get the job done right.

Leading-Edge Products

Our trained specialists have a wide range of packaged steel tower products, and the know-how to recommend an ideal configuration for your project. Because we source from a wide variety of suppliers, we can provide the best solution to meet your specific needs. We offer a new generation of high-efficiency products manufactured from fibreglass and composite graphite materials – lightweight, strong, durable and corrosion-proof.

24-Hour Service & Repair

Emergencies don't always happen during business hours. Whether you need parts or service, we're available, 24-hours a day, 7 days a week.

Call us at: 1-800-311-1200.

If You Need It, We've Got It

We've got the largest inventory in Canada, with parts for all makes and models. That means you're up and running faster, with no delays at the border.

Satisfaction Guaranteed

Your peace of mind is important. That's why we offer a full one-year warranty on all parts and labour. Plus you get a 36-point comparison checklist on quotations.
